
SKILLS AND INTERESTS

Programming Languages: C#, JavaScript(ES6+), CSS3, HTML5, TypeScript

Databases: Microsoft SQL Server, T-SQL, SQL Azure, MySQL, LINQ, Entity Framework Core

Frameworks: .NET Core, ASP.NET Core, jQuery, Bootstrap, Angular

Interests: Git, Jira, Agile Scrum, Nodejs, RESTful APIs, AWS, Microsoft Azure, Postman

PROGRAMMING EXPERIENCE

- **Phonebook ASP.NET Core MVC** – This app has full CRUD functionality. It allows a user to create phone book records to help organize phone numbers. I used Entity Framework Core with the code first approach. I created the models using C# then used EF to create a migration and setup the backend database. Locally it uses Microsoft SQL Server. I used Bootstrap for styling and creating the forms using Razor Syntax, and HTML.
- **Video Game Dashboard Angular 11** – Utilized Angular CLI to generate components, services, and classes. Used Bootstrap for styling. Wrote up components using TypeScript. Used Git for version control. Created HTTP service that calls external API to grab video game records based off the users search input.

EMPLOYMENT

Software Engineer Remote	Personal Projects	March 2021 – Present
<ul style="list-style-type: none">- Create .NET Core applications and invest time and money into building my skills using online resources.- Use GIT for version control and Discord for communicating with online community.- Developed a weather application using Vanilla JavaScript that utilizes an FCC Weather API Pass-through.		
Software Engineer, Intern Remote	Prosper IT Consulting	Oct 2021 – Nov 2021
<ul style="list-style-type: none">- Worked on a team to develop a Movie Theatre CMS web app using ASP.NET MVC. Used Azure DevOps to work on a Scrum/Agile sprint with daily stand ups. Utilized Entity Framework Core code first & C# to add new models based off UML diagrams. Also, used GIT for version control and for creating pull requests.- I created a new view that displayed all the information about the application. I utilized Razor Syntax, HTML, Bootstrap, and Flexbox to achieve positioning of other div elements on the page.		
Truck Driver Portland, OR	KeHE Distributing	Nov 2019 – Feb 2021
<ul style="list-style-type: none">-Proactive team player that would come in on my days off when needed to cover coworkers.-Made one of the biggest deliveries to Amazon Fulfillment for over \$80,000.-Utilized ELD logs to make sure my operating hours were always within legal requirements.		

EDUCATION

Hybrid, Portland, OR	Development Cert - The Tech Academy	Aug 2021 – Dec 2021
<ul style="list-style-type: none">• Completed 600 hours of hands-on programming experience and learned computer science fundamentals.• Studied version control such as Git. Learned about Agile/Scrum Methodology.• Course included: C#, .NET Core, ASP.NET Core, MVC, Entity Framework, JavaScript, HTML, CSS, and SQL.• Operating Systems, Databases, Algorithms, Programming Languages, Comp. Architecture, and Object-Oriented Programming Principles
